HARRY' S WELL

2020 RAM INFORMATION

All rams in the catalogue have had the following treatments:

- Scabiguard scratched as lambs
- O.J.D vaccinated as lambs
- Full vaccination program with Glanvac 6SB12
- (Last treatment 13/07/2020)
- Backlined with lice treatment Extinosad
- Drenched with Avomec Duel at 20ml/head
- (Last treatment 13/07/2020)
- Ovine Brucellosis Accredited (SA 1347)
- All rams paddock reared

**South Australian Property Identification Number
(S.A. 325198)**

**Vendor declarations and Animal Health Statements
are in the back of this booklet.**

All ram buyers will receive a complimentary beanie.

HARRY'S WELL

STUD HISTORY

The name Harry's Well originated from an old well that is on our property that dates back to the 1860's when this area was station country.

Photo of Harry's Well

The breeding of our White Suffolk rams started 13 years ago with the purchase of 22 stud ewes and a stud ram from the Foundation Breeders Sale.

The stud was registered in 2015 and since then we have purchased stud ewes from the Illoura stud and the entire Aroona Park White Suffolk stud.

Over the last 5 years we have seen a huge gain in the length and thickness of our rams, whilst much cleaner in the muzzle and legs compared to when we started the stud.

A big thankyou to the Nutrien Ag Solutions Golding Livestock Agencies team and all of our helpers for their support today.

Jody and I thank you for your attendance today and hope you find some rams that will suit your needs.

— Kenton and Jody Farr

SIRES USED FOR 2020 SALE RAMS

DAYS 17/354

Purchased at the Day's White Suffolk sale.

A huge and long ram. Very white in the muzzle.

OMAD 15/308

Purchased at the Royal Adelaide Show

A long, well balanced ram with clean points

ILLOURA 12/1354

Purchased at the Foundation Breeders Sale

A very white ram with good structure and depth of carcass

JANDEBREY 12/103

Purchased at the Janderbrey White Suffolk Sale

A well-balanced ram with very correct structure

HARRY'S WELL 17/075

A son of BUNDARA DOWNS 13/3546

Exceptional early growth. Stands well.

HARRY'S WELL 17/001

A son of ILLOURA 12/1354

A huge muscular ram with a clean white muzzle

GLOSSARY

I = ILLOURA

AP = AROONA PARK

HW = HARRY'S WELL

SIRES USED FOR 2020 SALE RAMS

Today's sale features the first sons of Day's 17/354, purchased for \$12,000.

FUTURE PLANS

This year we have embarked on the LAMBPLAN program for our 2021 rams. It is a slow and expensive exercise but it will give our clients additional information when selecting rams on sale day.

A good percentage of our 2021 sale rams will have full LAMBPLAN figures. In 2022, we aim to have all of our sale rams on the program with full figures available.

Again, this year we will look for new sires that show good length, width, structure and feet along with clean points and strong early growth figures.

We would also like to welcome Matt and Renae as they become more involved in the running of the stud. They have already proven to be a huge asset to the stud.

RAM HEALTH

We recommend to all that purchase rams to get them insured, please see Tania or Megan for details.

Remember to check the 5 'T's

**** Teeth, Toes, Tossle, Torso and Testicles ****

The importance of good ram management is often underestimated.

Look after your rams and their paddock to keep them healthy and in good condition all year round.

However, the last 7-8 weeks prior to joining is the most important to avoid poor lambing percentages.

Here at Harry's Well we give our rams a Glanvac 6B12 every 6 months and a Glanvac 3 every 8 weeks in between.

Since doing this we have virtually eliminated any ram deaths.

Please contact Gary Glasson our local Zoetis rep on 0418 812 457 if you have any questions.

Our rams are 100% paddock reared so they are ready to go when you get them home, all rams have been acclimatised to barley slowly over the last 6 weeks.

GUARANTEE

**** All of our rams come with a 12-month replacement guarantee****

Should a ram die within 12 months of purchase we will endeavour to replace it with a ram of the same value and age.

MUSCLE SCANNING

Muscle scanning was performed through Cousins Merino Services of Burra on 16/07/2020.

Ultrasound scanning enables ram buyers to accurately select rams based on how well muscled and how fat that animal is and without harming the animal.

It is also a valuable tool in breeding programs to promote genetic gain in carcass traits, especially when it is incorporated into estimated breeding values.

EYE MUSCLE DEPTH (EMD)

This is the depth of the eye muscle, measured at the C site (*45mm from the centre of the spine*).

Research from MLA and the Sheep CRC indicate that selecting a ram with a more positive eye muscle depth can:

- Produce lambs with greater muscling and the potential for higher yielding carcasses.
- Produce progeny with a higher proportion of their carcass weight in the more valuable loin and hind quarter area of the carcass.
- Research based on the eating quality of meat indicates that lambs with greater EMD are less prone to stress and dark cutting.

FAT DEPTH (FAT)

This is the measurement of fat depth at the C Depth.

- A deeper measurement indicates a fatter carcass
