

FARADAY PARK IS CELEBRATING 60 YEARS OF BREEDING POLL DORSETS

BRUCELLOSIS
ACCREDITED

POLL DORSET & WHITE SUFFOLKS

19TH ANNUAL RAM SALE

NEW VENUE: ON PROPERTY AT 677 South Road, PENGUIN

MONDAY 16TH NOVEMBER 2020 AT 1.30 pm

30 Poll Dorset, 30 White Suffolk, 14 Charollais X

****Free DELIVERY TO MELBOURNE WHARF****

VENDOR – Paul Day 0407 811 125

AGENTS

Nutrien – Jock Gibson 0418 133 595, Warren Johnston 0419 326 348, Andrew Porter 0417 142 802.

Webb & Woodiwiss - Reg Woodiwiss 0448 961 591, Mark Webb 0458 973 590, Rob Hogarth 0438 440 115.

LAMBPLAN TRAITS

Abbreviation	Trait Name	Abbreviation	Trait Name	Abbreviation	Trait Name
BWT	Birth Weight	PWWT	Post Weaning Weight	C+	Carcass Plus Index
WWT	Weaning Weight	PFAT	Fat Depth	TCP	Terminal Carcase Production Index

TERMINAL CARCASE PRODUCTION (TCP) INDEX

Key Points:

- Carcase Plus has been an important index for the sheepmeat industry but it has been found to have a negative impact on eating quality. Because of this and the industry's focus on delivering high eating quality outcomes for consumers, the index will be retired in March 2020.
- Carcase Plus will be replaced with the Terminal Carcase Production Index. To assist in the transition between indexes both Carcase Plus and Terminal Carcase Production will be available for the 2019 ram buying season.
- The Terminal Carcase Production (TCP) index will give similar improvements in growth and lean meat yield as Carcase Plus while also maintaining eating quality.

What is the new TCP index?

Indexes help producers select animals for use within a breeding program when there are a range of traits of economic or functional importance. This ensures that genetic gain in one trait is not made in isolation from other traits. Using indexes in ram purchasing decisions allow producers to make balanced genetic progress towards more profitable sheep.

The TCP index has been created to assist producers to achieve both gains in their major production traits, such as post-weaning weight and muscling, as well as ensuring consumer satisfaction from lamb is maintained through focusing on key eating quality traits such as shear force (tenderness) and intramuscular fat (marbling)

WELCOME

This year has been an unusual & very unpredictable year due to the whole COVID situation,

Sunnybanks & Faraday Park Studs have been fortunate to have continued success with the new style on-line auctions. It was of concern how sales this year would go given the lack of opportunity to show our sheep with the cancellation of all shows .

We were thrilled to have sold 10 Stud Rams & 3 Stud Ewes to 5 different states.

It is always satisfying when customers who have purchased in the past come back and buy again, It proves our genetics are working.

Once again, this year I will be donating proceeds from the sale of a ram to the Peter McCallum Foundation in memory of my good mate Tony Badcock

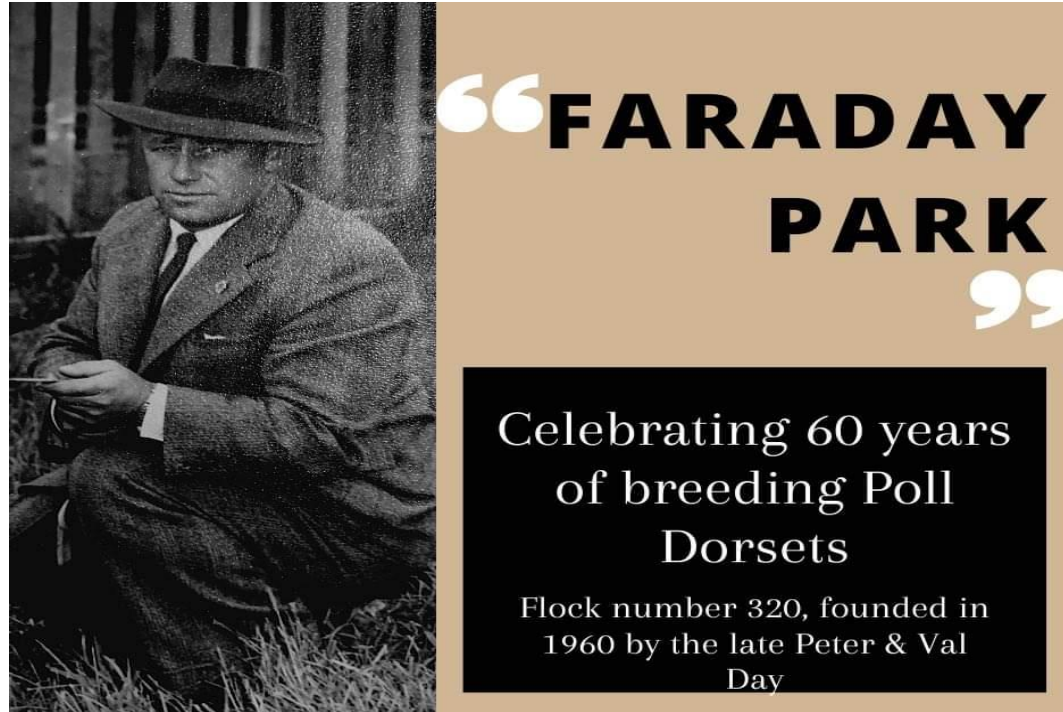

Each year we continually strive to improve our breeding stock ensuring only performing ewes are retained. We are selective in introducing bloodlines, concentrating on structurally correct sheep and muscling producing quality sires that will continue to breed on. We have been involved in AI programs to maximise the best genetics available.

Our breeding stock is culled each year to ensure quality stock is retained to achieve maximum potential. We pride ourselves on producing quality high yielding and structurally correct rams which have proven to sire quality lambs showing early maturity, growth and thickness.

Next Sale at Our New Venue:

Sunnylands Charollais – Friday 19th February 2021
677 South Road,
PENGUIN. TAS. 7316

Paul Day

Peter & Rosemary Day

Melbourne Champion Ram 2018

Peter Day with Sons Paul & Bradley

60 YEARS OF FARADAY PARK

Flock 320 Faraday Park is celebrating 60 years of operation in 2020 and the Tasmanian stud is going from strength to strength.

Paul Day has been behind the wheel of Faraday Park alongside Sunnybanks stud for the past decade and has enjoyed plenty of success.

Paul's grandfather Peter, began the stud, in 1960 at Ulverstone, and his son, also Peter, carried it on from 1968. Peter and his wife Rosemary Day spent their first four years at the helm of Faraday Park in NSW, but soon decided it was too hot and dry and returned to Tasmania. Peter says the Poll Dorset sheep of today are quite different from back in his day. They are now a slightly taller, longer lamb, making them the ideal wedge shape for ease of lambing, whilst not losing muscle definition. He says they are an excellent breed, a great meat producer.

Peter's time in the show ring was a highlight for him. He loved the opportunity to catch up with people, the chance to win a ribbon or two and potentially a future sale. Memorable moments for Peter were his first Hobart Royal Show champion ram and ewe, and first prize at the Perth Royal Show.

Paul has continued the success of Faraday Park in recent years alongside his own Sunnybanks stud. Possibly one of his career highlights would be taking out the supreme Poll Dorset exhibit at the Melbourne Royal Show with a Faraday Park Ram in 2018, the first year the stud had exhibited there.

Paul says he has learnt plenty from his dad over the years and continues his philosophy of quality over quantity. We utilise heavy culling to maintain a high quality.

Faraday Park and Sunnybanks will offer 30 Poll Dorset Rams, 30 White Suffolk Rams and 14 Charollais x Rams at their sale on Monday 16th November at 1.30pm. (Note: new venue – 677 South Road Penguin).

Sunnylands Charollais

In 2015, Sunnybanks entered into an exciting venture with Nigel and Diana Wade of the Capelands Stud, Table Cape which saw the beginning of Sunnylands Charollais'. This venture will see the first pure bred Charollais lambs born in Tasmania. Both families have over 65 years combined stud sheep breeding experience and have introduced Charollais' into their breeding programs.

Sunnybanks and Capelands studs are Poll Dorset, White Suffolk and Ryeland breeders respectively. Successfully providing both stud and commercial breeders with terminal sires, both studs believe the opportunity exists to introduce the Charollais breed into Tasmania, giving commercial breeders the opportunity to purchase Charollais sires locally.

The Charollais' fast finishing and early maturing qualities are fast becoming a popular choice of sire for commercial breeders. Their ease of lambing capabilities makes sires ideal for use over ewe lambs and maiden hoggets. Long carcasses with great loin and hind quarters are dominating markets with Charollais cross lambs regularly topping sale prices nationally.
