Note Lambplan and Stock Scan measurement sites for EMD Depth and Fat are taken at different carcass site areas and should not be compared against one another.

Over the last few months we have fully integrated the bulk of

our flock on to Lambplan, so the figures will take a while to settle down. Some selection is placed on Lambplan breeding values as a guide or tool, but we will not compromise structure, breed type or quality. Lambplan is a guide to assist you making genetic decisions on each animal and should not replace visual selection. **Balanced figures are important for consistency.**

UNDERSTANDING LAMBPLAN.

Bwt - Birth Weight. Rams with lower ASBV's for birth weight (BWT) produce lambs with lower birth weight. Both low (lamb survival) and high (lambing difficulties) should be avoided.

Wwt - Weaning Weight. Rams with a more positive ASBV for weaning weight (WWT) will, on average, produce lambs that grow quicker to weaning.

Pwwt - Post weaning weight. Rams with more positive ASBVs for post weaning weight (PWT) produce lambs that grow quicker and reach target weights in a shorter time.

Pemd - Post eye muscle depth. Rams with a more positive ASBV for post weaning eye muscle depth produce lambs that have more muscle, independent of weight, and a higher lean meat yield.

Pfat - Post fat. Rams with a more negative ASBV for post weaning fat (PFAT) will produce lambs that are leaner at the same weight.

Carcass + was the most widely recognised index on Lambplan. It is a desired gains index promoting animals with high growth, high muscle and a smaller emphasis on fat. The index was based on the 1990 average of 100. Sheep genetics have identified that by solely focusing on Carcass traits, it was having

a negative impact on eating quality. Therefore Carcass+ will be phased out from 2020 and replaced with a new TCP (terminal Carcass Production) Index which incorporates eating qualities and Carcass traits.

TCP The TCP Index has been created to assist producers to achieve both gains in their major production traits, such as post weaning weight and muscling, as well as ensuring consumer satisfaction from lamb is maintained through focusing on key eating quality traits such as shear force (tenderness) and intramuscular fat (marbling).

TCP has been developed by using extensive research using mainly Poll Dorset and White Suffolk genetics. Therefore we believe this new index is not the most appropriate index for the Southdown and should not be used to compare between breeds.

Fincham's Burando Southdowns

Southdowns have been in our family since 1955, we focus on long stong carcasses with easy live lambs on the ground with high twinning. We have lambed our mature ewes down this year and market at 178% with no sheds for special attention and will not shed them lambing as we do not want soft sheep. Live healthy lambs on the ground are what we are about that grow rapidly, with a combination of Australian and New Zealand genetics. We have always sold our rams privately over the years and now feel it is important to have a sale, so everyone can see our flock, so in the COVID 19 year, here we go.

This year's Southdown rams are sired by the sires Listed.

Chandpara 13/148 (T) (JR) -Purchased for the top price at the 2014 Chandpara Sale for \$5,000 sired by NZ Clifton Downs 241 out of Chandparas best Breeding ewe 23/08 is sired by NZ Clifton Downs 225, Full sister to 148 won at numerous national shows. Consistently puts on long bodied, big hindquarters and loins, positive fat and carcase an outstanding breeder. Caucher tested non carrier

Burando 16/B56 (T) Tank – Sired by Locdale 11051. Tank is breeding the house down for us and our friends Kirkdale Southdowns. Low birth rate high muscle, positive fat, IMF and carcase. An open clean faced ram that Lives up to his name Tank. Tanks figures are only mid parent values, and will improve greatly with more data. Caucher tested non carrier.

Fairbank 16/902 A powerful long and correct ram high growth and extreme carcase, balanced ram with a clean bare face and legs

Fairbank 17/867 (T) purchased for the top price of \$5,000 at Fairbanks 2018 sale in partnership with Kirkdale Southdowns. His sire is NZ Mapua 14706 .867 is a tremendous carcase sheep with a deep bodied , big hindquarter, clean bare face and legs. Caucher tested non carrier

Lochdale 17/025 (T) he was a huge Southdown when found in Tasmania 130kg and a big EMA at 15 months sired by Fernhill 210 who was champion ram at the National Southdown Show . Used to give our sheep a lift in frame with good carcase and balance with a clean face and legs. Caucher tested non carrier

1st Annual Southdown Sale Monday 9th, November 2020

Maccelslie Park 17/072 (T) purchased in partnership with Kirkdale southdowns sired by Kirkdale 13/242. Impressive carcase, feet and body open clean faced. Caucher tested non carrier

Burando 17025 (T) sired by Chandpara 148. B25 has grown into a big bodied carcase sheep and was purchased for China in March this year. Caucher tested non carrier

Fairbank 160864 (T) Purchased from Fairbank in 2017 for his outstanding carcase, clean bare face, legs and figures he is a breed trait leader for growth rate. Mother is sired by NZ Clifton Downs 241. Caucher tested non carrier
