

# Ryegrass

**DYNAGRO**  
SEED

 **MEROA**  
**TETRAPLOID ITALIAN  
RYEGRASS**

## FEATURES

- A long season, tetraploid Italian ryegrass
- Good seedling vigour and winter growth
- Rapid establishment
- High levels of palatability
- Fast recovery from grazing and cutting

## SCIENTIFIC NAME

*Lolium multiflorum*

## PLANT CHARACTERISTICS

Broadleaf tetraploid Italian

Bred to persist for 2-3 years under suitable conditions

## MATURITY

A late flowering plant designed to produce good quality feed late into the spring.

Days to flowering relative to Nui (0) = +17

## AREA OF ADAPTION

Medium to high rainfall zones and irrigation.

An area with a reliable spring is essential to maximise production potential.

## COMPARABLE TO

Aston, Emmerson, Feast II, Jeanne, Mona, Nourish, Thumper, Arise.

## SOIL TYPE

Meroa is well adapted to a wide range of fertility levels and soil profiles, but performs best in a well-drained loam. Tetraploid annuals will cope with short-term water-logging provided the growing tip is above water.

Meroa is well adapted to a wide range of fertility levels and soil profiles, but performs best in a well-drained loam soil. Tetraploid annuals will handle short-term water-logging provided the growing tip is above the water.

## FERTILITY

Good base rates of phosphorus are necessary for maximum DM production especially during establishment phase. DM production is directly related to nitrogen availability. Consult your Nutrien Ag Solutions agronomist for nitrogen application rates.

## SOWING

Sow at 25-30kg/Ha alone or 5-15kg/Ha when a component of a pasture blend. Sow seed no deeper than 1cm into a fine but firm seed bed. Sow into bared ground if direct drilling. Lightly harrow and roll to improve germination. Suitable for oversowing into an established stand. Note: Pasture productivity is directly related to successful plant establishment.
