# Sale Terms & Conditions

Any bull not sold in the ring will attract a \$250 premium per head after the sale.

There may be NO SUBSTITUTIONS of bulls.

(Please note this is a decision made by the vendors)

## **Insurance Disclaimer**

Insurance risk of stud animals sold at auction transfers to the purchaser at the fall of the hammer including animals remaining on the vendor's property. Purchasers therefore are advised to insure their animals at the completion of the sale. Stud animals are not covered by Commercial Livestock Insurance.

## **Inspection Disclaimer**

The 2021 Supreme Sale Bulls presented by vendors have been thoroughly inspected by the nominated WALSA agents, with a heavy emphasis on sound feet and structure for a working Sire.

## COPPLESTONE CHAROLAIS STUD

From the beginning Peter and Judy Milton have sought to breed a Charolais that is capable of consistently fulfilling the needs of Western Australia beef producers, we believe this year’s team is no exception. Selected for structural soundness, adequate muscle and exceptional softness these bulls also display impressive length moderate frame and the ability to sire easy calving low stress progeny. This year’s team is sure to have a bull to impress even the most discerning commercial producer.

Copplestone began with an extensive embryo program with genetics imported from Queensland, the careful implementation of targeted artificial insemination and frequent trips to all eastern states in search of both quality bulls and females has given the consistency and quality the stud enjoys today. Careful selection of leading polled sires over many years means that we are able to offer large numbers of polled cattle without sacrificing the performance breeders have come to expect from the Charolais breed.

We find the use of EBV’S to be an important tool in our decision-making. Time and time again we see the cattle with the best figures are our highest performing individuals. To this end all animals in this year’s team show exceptional figures with the physical attributes to match with many of the team boasting figures in the top 5% and 10% of the whole breed.

The years team consist of 16 poll or poll scurred white rising two-year old bulls and one horned specially selected yearling chosen for those wishing to get into our newest genetics a year early. We are also proud to support Brookside in offering two exceptional bulls (1 polled two-year-old and especially selected horned yearling).

All 19 bulls have passed semen tests with flying colours have been fully vaccinated in line with the Zoetis program ( Ultravac 7in1, Pestiguard and Vibrovax) and come with the Copplestone guarantee that they are ready to work.
