# Welcome

**We invite you to attend our 44th Annual Autumn on property auction and are pleased to offer you 240 performance recorded rising two-year bulls.**

Feature sires in this sale are Landfall New Ground, Rennylea L519, GAR Ashland and Lawsons Momentous. Other sires to note are Clunes Crossing Dusty, Landfall Keystone, Landfall Nobleman, Sydgen Enhance, Baldrige Beast Mode, GB Fireball and EWA West Point. We are proud of the balance our bull offering provides with a genetic package that is high performing in a functional and attractive phenotype.

Once again, we have made the move to increase our Autumn Sale offering. This autumn sale sees our largest offering to date with 240 bulls being catalogued. This is designed to continue to meet the strong demand that Angus bulls are currently experiencing and ensure that our client base can best manage the cost per pregnancy in their breeding operations. One of the other considerations with an increased offering is maintaining or improving the quality. Whilst our sale offering increases, so

does our annual calf drop giving us bigger pool of bulls to select for auction.

The Landfall genetic production system is closely aligned with commercial beef production ensuring our genetic package is relevant to and performs at all levels of the beef supply chain. We have just weaned our 2021 calf drop and our females have certainly drawn down some body condition to get their calves through to weaning. The pressure that our genetics are under in our system clearly identifies the outliers on both ends of the bell curve. The result of a higher stocking rate production system is cattle that are often, in their working clothes. We welcome inspection of our female herd at any time.

We have once again partnered with Achmea Insurance to offer an automatic insurance cover on all bulls sold at this coming Autumn sale. All bulls will be covered for 3 months from the

date of sale by Achmea's 2-star product. We have arranged and paid for this insurance, so it is no cost to you and is a unique offering in the marketplace.

The positivity that is evident throughout our client base is electrifying. Beef producers are being healthily rewarded for their solid investment over several years in improvements to their production systems. What an incredible time it is to be involved in beef production with the market at its highest point in history and the season across most areas producing a huge body of feed.

We would like to take this opportunity to thank all the Landfall staff, family members and associates for their valuable contribution to our program. The commitment and dedication of these people is vital to our success.

Kind Regards,

**The Archer Family.**

# About Landfall Angus

**Landfall Angus is a family owned and operated business located in the Tamar Valley in Northern Tasmania. Our cow herd consists of over 2200 registered females, making Landfall one of the largest Angus Seedstock herds in Australia.**

Landfall Angus cattle perform well in the natural environments of Australia, a direct result of our strong focus on the commercial realities of beef production. The Landfall Angus cow herd is highly fertile, functional and high performing. Careful genetic selection and improved production management techniques ensure that Landfall is a leading Seedstock herd in Australia.

## HISTORY

Landfall Angus was established in 1948 with the purchase of twelve females from the Australian mainland. The original Landfall cows were selected for their large frame and femininity. Sires from “Naranghi” in New South Wales, at that time bred by Mr. John Bott, were consistently breeding progeny that excelled in fertility and growth. They complimented the Landfall cows very well and these sires were used for 20 years.

In the early years of breeding bulls a small number were sold privately to regular Tasmanian and King Island clients. From 1975 an annual auction has been held offering bulls and females.

In 2004 a spring sale was introduced and is held annually on property offering bulls.

*We supply our clients with high quality Angus genetics that are fertile, structurally sound, easy doing and low maintenance without compromising the importance of growth and carcass performance.*

## TODAY

Landfall Angus is today owned and managed by the fourth and fifth generation of the Archer family. The Landfall herd now consists of over 4000 registered animals running over two main production centres in the Tamar Valley, calving 2200 registered females. The Angus herd is run alongside a self-replacing flock of composite sheep.

The Landfall herd is run under commercial conditions, in large contemporary groups. Artificial insemination and embryo transplant are used to increase the rate of genetic gain in our herd. Strict criteria is used for the selection of sires and dams within our breeding programs.

A strong emphasis is placed on the traits that contribute positively to the commercial profitability and sustainability of beef production. Firstly we aim to breed a functional female, focussing on structural soundness, docility, fertility and calving ease. Animals are joined for restricted periods resulting in short calving periods. Any animal not meeting the criteria is culled. The focus then moves towards growth and carcass quality with targets set above breed average whilst avoiding extremes. All registered animals are performance recorded with Breedplan and Landfall has been a member of Angus Breedplan since its inception in the early 1980's. Data is collected from animals run in large groups allowing us to directly compare genetics without the impact of environmental differentiation.

Annual sales are held on property in the Autumn and Spring, with in excess of 600+ bulls being sold annually.

## OUR GOALS AT LANDFALL ARE:

1. To provide our clients with superior genetics to help them achieve a sound investment and help to improve their bottom-line.
2. To produce genetics which perform well under the natural environments of Australia.
3. To have relationships of high integrity with our clients.

# Sale Notes

## 1. Location

8 kilometres from the centre of Launceston, North on East Tamar Highway. Follow A8 towards Georgetown. See page 111 for map and travel information.

## 2. Covid Restrictions

The situation with Covid-19 is an ever changing landscape. We plan to hold the sale on property and welcome our clients who feel comfortable to be here.

We will continually keep up to date with the restrictions that we need to have in place to keep everyone safe leading up to and on the day. Should anyone not feel comfortable to be here or is unable to travel from interstate please get in touch with us if you require assistance in making your selections to operate in the auction remotely.

Page 110 includes our QR code allowing check in convenience on day of sale. Your health, safety and level of comfort are of the highest priority to us.

Food and refreshments will be offered with strict adherence to the Covid restrictions. QR Code check in will be required – further details on page 110.

## 3. Rebates

4% rebate commission offered on all bulls to agents settling within 7 days of invoice. All purchasers must nominate their agent 24hrs prior to the sale with Nutrien Livestock. Please email [livestocktas@nutrien.com.au](mailto:livestocktas@nutrien.com.au) or [frank@landfall.com.au](mailto:frank@landfall.com.au)

## 4. Freight

Free freight on all bulls to Melbourne, Grassy and Lady Barron ports for lots sold by auction. Free freight on all bulls within mainland Tasmania. The vendor or his agent will make freight arrangements (conditions apply).

## 5. Nutrition

All bulls have been fed grass with supplement silage.

## 6. Animal Health

- All bulls have been semen tested and had their penis and testicles examined.
- All bulls have been tested as BVD P.I. negative.
- All bulls have been vaccinated with Vibrovax, Pestigard and Ultravac 7 in 1.

## 7. Recessive Genetic Conditions

All lots are clearly marked with their respective genetic status.

## 8. Bull Guarantee

All bulls covered by the Landfall Bull Guarantee (see details on page 102 of this catalogue).

## 9. Sire Bulls

Lots 1 through to 51 have been used for joining in the Landfall herd in the Spring of 2020. Please take this into account when assessing these bulls.

## 10. Semen Rights

Landfall Angus reserves the right to collect any bull sold for use in the Landfall herd. Collection will be at Landfall's expense and at the convenience of the purchaser.

## 11. Photos and Videos

Ben Hooper from Clear Vision Imaging has captured videos of all sale lots. They will be available late Mid-February at [www.landfall.com.au](http://www.landfall.com.au)

## 12. Registrations

Please note: some lots are HBR registered and some are APR registered. All animals are eligible for transfer with their respective registration status.

## 13. Inspection

All bulls will be available for inspection at Landfall on Sunday the 20th of March from 9am until 12pm. Inspection any other time is welcome by appointment.

### PLEASE NOTE:

As vendors, the Archer family at Landfall want your valuable new purchase to be given every opportunity to travel and settle into their new environment with a minimum of stress.

To this end we ask you to nominate;

### CLEAR DELIVERY INSTRUCTIONS.

Short notice requests for collection of animals will not be accepted.

Images and videos of most lots will be available on our website closer to sale date.

**Thank you for your co-operation.**

### DNA SUFFIX KEY:

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

**PV:** both parents have been verified by DNA.

**SV:** the sire has been verified by DNA.

**DV:** the dam has been verified by DNA.

**#:** DNA verification has not been conducted.

**E:** DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

**DISCLAIMER:** Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, neither the vendor, Angus Australia or the selling agents assume any responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

**Notes**

New Ground is from a high-quality female line, and we expect daughter quality to be one of his strong points. His first daughters have just weaned calves and are an impressive line of young females. His progeny are attractive to the eye being very well balanced with even performance and quiet temperament. New Ground is now seeing heavy use across the industry. A total of 47 sons on offer in this sale.

#### Notes

A sire with a great data set and breeds progeny with phenotype to go with it. L519 progeny are easy doing type cattle with good length and shape. Structural soundness and docility are very much his strong points. A heavy use bull across the breed both at a commercial and seedstock level, he has impressed cattle breeders across the country. A total of 38 sons on offer in this sale.

#### Notes

Still breeding bulls towards the top end of the catalogue, Keystone is one of the highest use bulls across the industry over the last three years, he is a genuine curve bending sire, who breeds consistency in his progeny. An Edmund son with added frame and length, we are experiencing good foot and leg structure with a clean front end. Progeny are displaying above average frame and length with docility a strong point. A total of 11 sons on offer in this sale.

# Stud stock insurance with all bulls purchased at the Landfall Angus Autumn Sale

**Achmea Australia, Australia's specialist farm insurer, is delighted to attend the Landfall Angus Autumn Sale. For all bulls sold in this catalogue Achmea Australia will provide 2 star cover for 3 months. This cover has been paid for by Landfall Angus.**

At the end of the 3 months if you want to purchase cover, please contact our Farm Insurance Specialists: Michelle Stevens (0437 249 682) and Rebecca Muir (0437 221 914) both will be attending the sale.

Achmea Australia offers Stud Stock insurance, designed to protect the stud bull from the moment the hammer falls. With our Stud Stock insurance cover, you decide what you need, when you need it and how you need it.

Our flexible options include:

- **1 Star** Mortality only (including transit)
- **2 Star** Mortality including accidental loss of use
- **3 Star** Mortality including accidental loss of use, sickness and disease.

**[achmea.com.au](http://achmea.com.au)**

# Caring For Your Bulls

## More calves, more years

**Your bull is an important investment. With proper management you can achieve a longer working life from your bull resulting in more calves at a reduced cost per calf.**

### 1. Arrival on farm

- a. Have some quiet cows or steers in the yard when the bull arrives. He will often be unsettled as he has left his mates and travelled on a truck for his first time. Give him some time to adapt to his new surroundings.

### 2. Pre-Joining

- a. Your new bulls will benefit from exposure to some empty cows for 2-3 weeks prior to their normal breeding period. This exposure will allow them to service some females and become exposed to any of the normal pathogens in your cow herd. If you have purchased multiple bulls, expose them only two at a time. It is then important to give your bull time to recover following the exposure period before the joining season begins.
- b. Do a pre-joining Breeding Soundness Examination (BSE) on all bulls to evaluate; structure, testicles and serving capability. This is the opportunity to identify any bull which may delay cows going in calf. Also administer booster vaccinations.

### 3. Joining

- a. Don't over join new bulls (maximum of 40 cows).
- b. Multi-sire join where possible to minimize the risks associated with a bull breaking down in the joining period. If you need to single sire join observe closely and rotate with a proven bull for at least 1 cycle. New bulls are the most at risk of break down, ensure you check them regularly.
- c. Most bull fertility issues develop during the joining period rather than being pre-existing problems. This means regular checking of bulls is essential (2-3 times a week for the first 3 weeks then weekly).

Check for:

- Try to observe the bull serving (mounting is not a successful serve)
- Any signs for lameness
- Evidence of penile or preputial swelling
- Any signs of ill health (lethargic, etc)
- Number of cows cycling (5% cycling per day if not in calf, this should decrease as cows conceive)

### 4. Post Joining

- a. Your bulls will spend most of their life in the bull paddock. You need to try minimize bull paddock injuries (bull fights) by not overcrowding the paddocks and possibly removing aggressive dominant bulls. Ensure young bulls have access to adequate feed to continue growing. Mature bulls should not be allowed to get fat, keep them in condition score 3. Mature bulls kept in body condition score 3 will have a longer working life.
- b. Pregnancy test early to identify any joining issues. This early pregnancy test will not only give you more time to make better decisions but it will also help identify the potential case of sub-fertility and allow you to prevent the problem in subsequent years.

# Understanding the TransTasman Angus Cattle Evaluation (TACE)

## WHAT IS THE TRANSTASMAN ANGUS CATTLE EVALUATION?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcass, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

## WHAT IS AN EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

## USING EBVS TO COMPARE THE GENETICS OF TWO ANIMALS

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg

difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcass than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

## USING EBVS TO BENCHMARK AN ANIMAL'S GENETICS WITH THE BREED

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

## CONSIDERING ACCURACY

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

## DESCRIPTION OF TACE EBVS

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcass merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

## UNDERSTANDING ESTIMATED BREEDING VALUES (EBVs)

### BIRTH

CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.

### GROWTH

200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.

### FERTILITY

DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.

### CARCASE

CWT	kg	Genetic differences between animals in hot standard carcass weight at 750 days of age.	Higher EBVs indicate heavier carcass weight.
EMA	cm <sup>2</sup>	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate larger eye muscle area.
Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more fat.
P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcass.	Higher EBVs indicate more fat.
RBV	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcass.	Higher EBVs indicate higher yield.
IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcass.	Higher EBVs indicate more intramuscular fat.

### OTHER

NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.

### STRUCTURE

Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.

### SELECTION INDEXES

\$A	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
\$D	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the \$D supermarket trade.	Higher selection index values indicate greater profitability.
\$GN	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
\$GS	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

# Bull Guarantee

**At Landfall we understand and value the economic importance of fertility within a beef herd. Empty cows are a huge cost to a producer and at Landfall we are doing our utmost to limit the unexpected outcomes in a breeding situation.**

In an endeavour to provide our clients with a professional service, we have implemented this bull guarantee. It is to ensure that both Landfall and you (our valued client) have a clear understanding of each others obligations.

Our breeding bulls are assessed under a stringent set of guidelines to ensure minimal exposure of our clients to fertility issues.

- ✓ All bulls are structurally assessed and those that don't meet the specifications are culled.
- ✓ All bulls are semen tested and have their penis checked by an independent veterinarian.

At Landfall we are aware that even after these stringent tests are carried out that there is a risk that a breeding bull may still not work to their expected potential. Therefore our guarantee covers that risk; however it does not replace good management and due care by the purchaser.

## GUIDELINES

Landfall guarantees breeding bulls from the date of purchase against loss of fertility due to structural failure of the bull for a period of two years. For example, corkscrew penis or bad feet. Our guarantee does not cover situations such as broken penises, prolapsed prepuce and broken legs etc.

In the event of a less than acceptable mating outcome, the bull will be assessed by a veterinarian chosen by Landfall and if the bull is found to be the cause of the infertility then Landfall will offer compensation in the form of:

### FIRST YEAR (12 month period from date of purchase)

100% of the purchase price in the form of:

- Replacement with an equivalent bull to the mutual agreement of both the vendor and purchaser.
- Credit for use with further purchases.

### SECOND YEAR (12 to 24 month period after purchase date)

50% of the purchase price in the form of:

- Credit for use with further purchases.

In the event that one of the above credits is issued it must be used within 12 months of the issue date or it will be forfeited. If a credit is issued it is non-transferable.

(The original purchaser of the bull is the only eligible party to claim a credit).

The infertile bull is then to be slaughtered with proceeds of the sale to be paid to Landfall. Landfall will cover the veterinary expenses and transport costs of the bull to an abattoir.

**Landfall will not be held liable and does not offer compensation for loss of income in the event of infertility resulting in non pregnant females.**

# The Obligation of the Purchaser

**The Landfall Guarantee is not a replacement for sound management practices. The guarantee is provided to cover the performance of the bull where breeding cows are managed to recognised industry standards. The purchaser of the bull is expected to observe joining, monitor for later cycling and record any repeat cycling in the females. If any problems arise it is expected that the purchaser notifies Landfall within 3 months, after the end of the joining period.**

At Landfall we recognise there is an infertility risk involved in breeding herds. We breed our bulls so as to limit the financial and production risks involved. If for any reason there are any unexpected

outcomes with Landfall bulls we stand by our product and do not expect you the producer to have to bear the entire financial burden. If you have a problem we want to be the first to know about it. We

have confidence in our bulls and offer a commitment to our clients that our product and service is of the highest quality achievable. Your success is ultimately our success.

## **FREIGHT**

- Free sea freight to Melbourne, Grassy and Lady Barron on all bulls sold at auction
- Free freight within mainland Tasmania on the condition that all bulls sold by auction be delivered within one week of purchase

## A LITTLE BACKGROUND TO LANDFALL FARM FRESH...

Landfall Farm Fresh is our specialist butcher and fresh food business in Launceston. We provide our very own Landfall Angus Beef and Prime Lamb direct from our farm to our loyal and wide-ranging customers.

Our fully integrated, true paddock to plate supply chain, delivers a transparent and trusted red meat choice. Customers appreciate knowing the provenance, story and integrity of our free range and grass-fed beef and lamb. We credit this largely to the success of our primary production business and the work and dedication of previous generations. Our grandfather, Robbie Archer, always held the vision of opening a butcher shop – so today his dream lives on!

We strive to build positive relationships with our customers and create positive eating experiences. We are passionate and proud to provide locally grown, consistent premium quality produce, and exceptional customer service.

We welcome you to visit us in store Wednesday to Saturday at 49 Balfour Street Launceston, and to follow us on Facebook and Instagram.

49 Balfour St, Launceston

# Why should I choose a butcher that does whole animal butchering - the advantages

They say traditions and trends run in a loop and tend to find their way back. Whole meat butchering was a practice that people associated with rural settings. However, as consumers become more conscious of what we eat and where we get it from, this is something that is gaining steady popularity.

Advantages of buying from a shop that does whole meat butchering:

### 1. Source clarity – you know where your meat is coming from

Perhaps one of the biggest advantages of choosing a shop that does whole animal butchering is that there is no room for doubt or any grey areas as to where the meat came from.

The butcher can tell you exactly where it came from, it's feed, and everything else you may want to know about your meat.

### 2. Sustainable – environmentally friendly

If you have chosen to forego buying bulk delivered cuts from mainstream stores, you are on the right track. Buyers and consumers, it is our responsibility to support sustainable practices.

The butchers tend to utilize most parts of the animal, thus limiting wastage and creating a more sustainable system.

### 3. Better taste – fresher

This one's a given and probably why fancy restaurants charge an arm and a leg for the rare piece of steak you want to order.

Bulk packaged meat maybe stored and aged before it hits the shelves at the supermarket or delivered to your butcher who then unpacks and sells.

Although buying an entire animal and then choosing how to cut it is more labour-intensive, the idea is also to move people away from solely focusing on famous cuts such as the ribeye and move towards cuts that are less costly but just as recipe appropriate.

### 4. Customised cuts – flexibility

Butchers who process whole animals have the beauty of preparing specifically requested cuts. Not all butchers have the whole animal flexibility to allow the preparation of specialised orders. Attention to detail is required and whole animal butchering is a real work of art with few young butchers now learning this skill.

### 5. Dry-ageing

Whole animal butchering supports the process of traditional dry-ageing on the bone.

At Landfall Farm Fresh we source our animals directly from Landfall and Greenhythe – only a small percentage of our primal cuts are outsourced from Cape Grim on the north-west coast of Tasmania. We process whole animals and enjoy working with our customers to meet their needs and provide positive eating experiences.

## Beef ribs in BBQ sauce – slow cooked short ribs!

NOW SELLING ONLINE  
VISIT OUR  
ONLINE  
STORE

By Nagi

Full recipe: <https://www.recipetineats.com/bbq-beef-ribs-slow-cooked>

🕒 Prep Time: 15mins    ⏱️ Cooking Time: 4hrs    🍽️ Serves: 6

Dead easy – everything goes into the pan, then you slow cook it in a moderate oven until the meat is fall apart tender. It's fabulously foolproof because there's a big window before the meat will start to dry out from overcooking – I've left it in 1 1/2 hours too long and it was STILL juicy!

### Ingredients

- 6 x 300 - 350g beef ribs (aka beef short ribs)

### RUB:

- 1 tbsp brown sugar (sub white)
- 2 tsp paprika
- 1 tsp garlic powder (sub 1 tsp fresh garlic)
- 1 tsp onion powder (sub garlic powder)
- 1/2 tsp cumin powder
- 3/4 tsp mustard powder
- 1 tsp salt
- 1/2 tsp black pepper

### BARBEQUE SAUCE:

- 2 garlic cloves, minced (sub 2 tsp powder)
- 125 ml apple cider vinegar
- 335 g Aussie tomato sauce
- 80 g brown sugar, loosely packed (sub white)
- 2 tsp EACH black pepper, onion powder, mustard powder
- 1 tsp cayenne pepper
- 1 tbsp Worcestershire sauce (sub soy sauce)
- 500 ml water

### Method

#### Step 1

Preheat oven to 160°C.

#### Step 2

Mix Rub in a small bowl large, enough to fit one rib.

#### Step 3

Press beef ribs into the rub, coating all sides. Shake off excess.

#### Step 4

Mix Barbecue Sauce ingredients, except water, in a baking pan. Then mix in water.

#### Step 5

Place ribs in sauce, turning to coat. Arrange meat side down in the sauce, bone side exposed (sauce won't cover completely, that's ok).

#### Step 6

Cover tightly with foil or lid, bake 3 1/2 hours.

#### Step 7

Remove from oven, remove foil. Turn ribs (some may have fallen over, that's ok, just turn them). Spoon over sauce.

#### Step 8

Bake 30 minutes uncovered, spooning over sauce again halfway through, until surface is caramelised and sticky. Check to ensure ribs are tender - pry a bit apart using two forks. (If not, cover and return to oven, but after 4 hrs they certainly should be!)

#### Step 9

Remove ribs onto serving plate (use a spoon as meat will barely be attached to bone, if at all). Mix sauce to bring together. Serve with ribs!

# Nothing beats farm life to raise a family.

The small country town of Marrawah, on the North West coast of Tasmania, is where I grew up with my farming family. My education commenced at Redpa Primary School before attending Smithton High School, graduating in year 10.

It was then that my career in farming commenced on the family dairy farm, milking cows. I looked forward to my weekends which were taken up with country football playing in the Circular Head league.

I was very fortunate, a great opportunity came along. I was offered a job working on a beef farm at Arthur River, working under a great mentor, David Riddoch. David taught me a lot about animal health and the grazing management of large herds. I only intended staying for a year, but ended up being there for three years, leaving with a wealth of knowledge of the beef industry.

I then returned to the family farm milking cows with my brother

and father. It was around this time that my father purchased a block of land on the Welcome River which was mainly heath country. We developed this block into grazing land as a run block for our dairy replacement heifers. At the same time we commenced a small beef enterprise which was mainly first cross out of our dairy cows. As the years passed we slowly developed more grazing land allowing our stocking rates to increase.

Life was not all about work, I was still enjoying playing football and it was then that I met Karen. We later had our son Kayden. I do not think there is a better place to bring up a family than on a farm. As Kayden grew up, I could see he was developing a strong passion

for sport, so Karen became his personal courier running him to his football and cricket. We enjoyed watching him develop his skills, especially with cricket.

*“I have the highest respect for all the Landfall team for the passion they have for this industry.”*

As the years passed we continued building our beef herd side of the family farm into a more pure beef operation. We then commenced an annual on-farm calf weaner sale each October, a time which we all enjoyed. Once the beef side of our business was

Marrawah – my favourite rock fishing spot.

Holiday time for Karen and I.

running smoothly we decided, as a family, it was time to sell the dairy cows allowing us to free up time for our family.

By this time Kayden was living in Hobart, so Karen and I decided

to step outside of our comfort zone and try something different. We made the move to Launceston where Karen got a transfer in her job. It was then I

commenced working at Landfall. I was so fortunate and thankful to Ed Archer for the opportunity he had given me. I have the highest respect for all the Landfall team for the passion they have for this industry which is reflected in the pedigree of the bulls they continue to breed.

Karen and I still enjoy visiting the Marrawah area, especially when I can find the time to pursue my love of rock fishing at Nettley Bay.

Thanks to all those who were able to attend our Spring 2021 sale.

# Spring Sale 2021 Round Up

Mimi Churchill & David Bennett

**Our auctions are always a time for our industry peers, family and employees to not only talk business but also to get together for a social catch up!**

Our family and staff always enjoy hosting so many of our clients and friends from all over Australia and home. We have certainly been missing those who unfortunately can't attend in person due to Covid restrictions. We look forward to the future when we can see them all at Landfall once again.

Thanks to all those who were able to attend our Spring 2021 sale. We would like to thank Wendy Giles of Nutrien who has handled the administration side of our sales for many years now. After 38 years Wendy has decided to move into another industry. We will miss Wendy and her efficient ways. Our very best wishes to Wendy.
