MFD: Fibre Diameter

(the average micron result of a sample).

SD: Measures in microns the spread of the fibres either side of the mean fibre diameter.

CV: Measures the spread of the fibre diameter variation relative to the mean fibre diameter as a percentage.

CV=SD/Mean Fibre Diameter X 100

CF: Measures the % of the fibres below 30 micron.

SF: Spinning fineness. FC: Measures how rapidly the fibre curves or bends.

Whilst all due care and attention has been paid to accuracy in the compilation of this catalogue, neither the vendors nor the selling agents or representative(s) thereof assume any responsibility whatsoever for the correctness, use or interpretation of the information on animals included in this sale catalogue

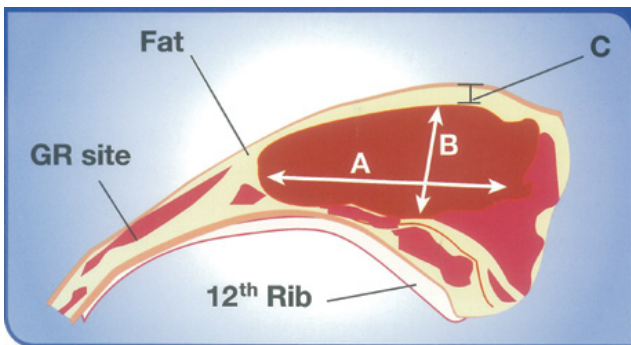

Figure 1: Exposed 12th rib on the carcass cut through the last thoracic and first lumbar vertebrae.

The Image above shows the location of the measurement sites: the eye muscle width (A), eye muscle depth (B) and fat over the eye muscle (C)

Meadow View Poll Merino Stud will offer 50, May 2021 drop Poll rams at this year's sale. 2022 will be our 12th year as part of the Eastern Riverina Merino Breeders Sale at Culcairn. Our focus remains on breeding sheep which are large framed, fast maturing with heavy fleeces that have good crimp definition, long staple length and are well nourished at around 19 micron. We are also selecting for high fertility, good carcass traits, such as high muscle and fat. This means lamb survival at birth is higher, and with more lambs on the ground, excess stock can be finished and sold off earlier. By using semen from some of the best performing sires around the country, we believe this is evident in the rams we will offer for sale at Culcairn.

All lambs are Gudair vaccinated annually at marking, and have been since 2003. Brucellosis Accredited Free, Vet checked in August 2022.

Rams shorn 1st March 2022

VALLEY VISTA POLL MERINO STUD

Reg Flock No: 1114

Pitson Family

474 Thugga Lane, Culcairn NSW 2660

Contact Number:

James: 0488 938 945 Stuart: 0427 365 232

"Valley Vista Poll Merino Stud" was registered in 1990 following the purchase of 50 stud ewes and semen from Roseville Park Poll Merino Stud dispersal sale.

Valley Vista, which is located mid-way between Culcairn and Holbrook in the Eastern Riverina, will be offering 35 May-June 2021 drop rams at its 32nd year of selling at the Riverina Poll Merino Sale.

At Valley Vista we pride ourselves on producing, high quality, large framed, early maturing, productive, 16–20-micron rams, which are selected to improve wool and meat traits for our clients. Our adult sheep consistently produce 7-8 kgs of soft, bright, stylish wool in a rainfall zone of roughly 27 inches per annum.

This year's line-up consists of progeny from the following genetic lines:

- Wallaloo Park Eureka Son (purchased in 2017)
- Yarrawonga 961 Son (purchased in 2018)
- Wallaloo Park 18-0063 (purchased in 2019)
- Wallaloo Park 19-0392 (purchased in 2020)

All of these sire being selected for their dual purpose attributes.

All lambs on the property are vaccinated with Gudair, with our property also being Brucellosis accredited. Sale Rams were scratched with Scabi-Guard and treated with Viper, in addition to being all Vet checked 29/7/22.

We would like to thank all previous clients for their valued and continued support.

Thanks,

Stuart Pitson

OLD COBRAN

POLL MERINO STUD

EST 1954

Rich in history, with a focus on the future

Registered Poll Flock no. PN 32

2022 Sale Entries

There will be 22, 2021 drop rams up for auction.

- All rams are up to date with their 6in1 vaccinations and are Gudair vaccinated
- All rams are DNA parent verified
- All rams are Genomics tested and will have Australian Breeding Values available
- All rams are non-mulesed (mulesing was ceased in 2017)
- Rams are June/July drop and were shorn on 2nd March 2022
- Brucellosis Accreditation number: Y056
- All sale rams have been Veterinary checked by Holbrook Vet Centre
- Post-sale, there are selection of grade rams available as of 12th September 2022

Various Old Cobran Sires (listed in catalogue)

Established in 1954 on Boonoke blood from Deniliquin, Old Cobran was one of the first registered Poll Merino Studs. Old Cobran Poll Merino Stud is now based in Mullengandra, NSW between Holbrook and Albury. The Martin family have a clear breeding objective – to breed a productive Poll Merino that doesn't require mulesing and works well in all current and future market opportunities. This is achieved through strict selection of balanced traits, such as wool, carcass, and fertility. Sheep are selected based on phenotype and genotype, with the entire flock being genomic tested and DNA parent verified to improve selection decisions with the aid of ASBV's which allows our clients to buy with confidence. We continue to put immense pressure on these commercially driven traits within the stud and in our commercial sheep. These traits heavily align themselves with current market and changing climatic conditions. Our proactive approach ensures we can remain adaptive to future demands and changes.

HURLSTONE PARK POLLS

POLL FLOCK# PN-1543

216 Mygunyah Lane

MULWALA NSW 2647

Ph: 0427 311 578

Email: hurlstone@lambtastic.com.au

Ovine Brucellosis accreditation #: Y 539

"Hurlstone Park Poll Merino Stud" was founded and formed by Brothers Ruston & Ryan Donovan in 2015 by using a Woodpark & Coddington Uardry Poll Merino Ewe base. We maintain our focus on breeding an "Up to Date True Dual Purpose Poll Merino", currently with an average micron of 18.5 in a 24 inch annual rainfall area, with a recently reviewed Breeding Objective to fine this up by 1 full micron to 17.5 average.

This year's team of rams on offer reflect this. These Rams will put your flock in good stead to capitalise on the financial gains at the finer end of the wool market, without compromising excellent growth rates or carcass confirmation.

The 2022 Culcairn team consists of all genuine rising 1 ½ yr olds.

The Sire of all these rams on offer is:

HU16-0571 a son of Sire: CU13-5034 (Robert Bruce)

& Dam: Woodpark.

His figures taken as a 2yr old were

17.4 MFD, 2.7 SD, 15.5 CV, 99.9 CF, 38.5 EMD, 82 EMW, 6 FAT

He was our lead ram in our inaugural sale back in the 2018 ERPMS and topped the sale.

Semen was retained within our stud and has had a major influence on our Stud Flock regarding our current breeding objectives.

He has genetic potency and predictability, and his progeny don't disappoint!

This year is our 5th year at the ERPMS. All rams are guaranteed and pose to continually influence your flock positively with their up to date characteristics.

All rams are Gudair Vaccinated, Scabi-Guard & Vet Checked.

Shorn 2nd March 2022
