## Market Report

Today's offering of 852 head was comprised of a significantly larger number of steers in comparison to heifer numbers. 591 male weaners sold to a subdued gallery of buyers with values easing 10-15c/kg for lot feeder entry weights and 20-25c/kg for medium and light weight backgrounding and grass fattening steers.

The heifer offering, whilst reduced in number increased in value with some drafts of first pick heifers selling as replacement breeders and good quality, well-muscled background weights meeting with additional competition this week with the presence of a few new buyers and orders.

**NEXT SALE: 4th DECEMBER 2024 (1ST SALE)**
